

Your Achievements in AIMS	A	B	C	D
	A: strongly agree, B: agree, C: disagree, D: strongly disagree			
(1) The AIMS-IU program enhanced my ability to collaborate with people having different lifestyles and cultures.	7			
(2) The program equipped me with specialized knowledge and skills useful for my future.	5	2		
(3) The program developed my problem-solving abilities.	5	2		
(4) The program improved my English and communication skills.	4	3		
(5) The program improved my awareness on issues faced by the ASEAN region.	4	3		
(6) The program increased my motivation to work for developing science and technology in my country or/and ASEAN.	4	3		
(7) The program increased my motivation to work for sustainable development of my country or/and ASEAN.	6	1		
Is any of the above particularly important for you? Are there any other achievements that you have made in the AIMS program?				
➤ Besides those mention above, this program lets me to make friendship and relationship among ASEAN-Japan student. I believe such kind of 'connection' would improve my career in the near future. In the AIMS program, I also joined in ISCIU (Int'l Student Conference in Ibaraki University) and presented my under graduated thesis. It was a great experience for me. (IPB) ➤ After joined AIMS program in IU, my mind more open towards the issues faced by ASEAN region moreover in sustainable agriculture and the effects of climate change towards it. From the discussion and presentation (learning methods in class) I also improved my English and communication skills. (IPB) ➤ From joining the AIMS program I can get more confident and new experience of living with another people with different background. (UGM) ➤ The AIMS-IU program enhanced my ability to collaborate with people having different lifestyles and cultures. (KU)				
Curriculum	A	B	C	D
(1) The program provided an appropriate variety of courses.	1	4	1	
(2) The program schedule and timetable were appropriate.	4	1	1	
What did you like about the AIMS-IU curriculum? What improvements do you suggest?				
➤ I wish in the next aims program the student could only choose 1 lab. So that, the students can more focused on their research and also can conduct deeper research. (IPB) ➤ I like about AIMS-IU curriculum that those courses are general so even though we are from different major we can follow and understand all the classes. (IPB) ➤ This is my first time to study about disaster risk. I think this subject is very important because Indonesia also has so many natural disaster and we have to aware about that. So, from this kind of courses I can have new way of thinking for my country. Maybe it will be good to know more about agricultural in Japan and has some fieldtrip that has more correlation with agricultural in Japan. (UGM)				
Your Personal Ability and Participation	A	B	C	D
(1) My English ability was enough to follow the classes.	4	2		
(2) I actively participated in classes and extracurricular activities.	4	2		
How are you satisfied/not satisfied with your own ability and attitude in participating in the IU-AIMS program?				
➤ I love the discussion session in each class. It helps me improve my speaking and listening ability. (IPB) ➤ I was quite not satisfied with my English ability because I couldn't participate actively in the classes. (IPB) ➤ I really happy to improve my English skill through this program. I can use my English more than when I was in Indonesia. But I really sad because my Japanese skill is not good. I already learn a little before going but I think that was not sufficient although I can improve a little about my Japanese skill from my friends. (UGM)				
IU Facilities and Support	A	B	C	D
(1) I am satisfied with research and experiment facilities and appliances at IU.	5	1		
(2) I am satisfied with the living environment and facilities at IU campus.	5	1		

(3) I am satisfied with the Tutor System at IU.	5	1		
(4) I am satisfied with support by IU faculty and administration.	6			
What did you like about the facilities and support for your study and life at IU? What improvements do you suggest?				
<p>➤ The tutors helped me a lot. They helped me not only in class but also outside. We often played together and they made me adapt with japan culture easily. Actually, I hope could join the student club. Maybe the next program can gives the chances to next AIMS student. (IPB)</p> <p>➤ I am very satisfied with the facilities that provided by IU, even they have food processing facility that I (as a food technology student) can use as a learning facility. But I'm quite confused with the tutor system. Because in one lab, the tutor really help me with all the activity in lab including fieldwork and my research. But in another lab, my tutor didn't even inform me about the seminar or fieldwork. So my suggestion, maybe make clear about the job desk of the tutors. (IPB)</p> <p>➤ I really love the laboratory. I think all laboratories in IU. It has a complete machine to conduct some kind of research. The toilet is very nice and I also enjoy staying in library. Because we can use the library not only in the weekdays but also in the weekends, very nice! I think it will be better to add some English protocol in one places because it will be easier for the foreigner student to accessing something. (UGM)</p>				
Overall Experience	A	B	C	D
(1) Overall, I am satisfied with the AIMS-IU program	6			
Any other comments or suggestions?				
<p>➤ I am very satisfied with AIMS-IU program. My suggestion is for the Classes maybe IU can motivated their students to join English class so our class will be more rich with knowledge from Japanese students too. And the other suggestion is open Japanese language class that could be transfer into our credit. So, if we join the Japanese class, we have to attend every class and do the assignment and homework, so our Japanese language skill will be increase significantly. (IPB)</p> <p>➤ It's very nice to stay in Ibaraki and has experience in IU campus! Very nice atmosphere to study and I love to do the lab works but I think for the class, it will be better to have some English class with some Japanese. maybe, it's not easy thing because it also happen in Indonesia, not so many student want to join the international class but since now I will try to persuade my friend to join the international class because I know that have a class with some international student not only interesting for myself but also for the foreigner student to have interaction with local people.. (UGM)</p> <p>➤ I am really satisfied with the AIMS system in IU. It was perfectly organized. The contents of the class about sustainability and climate change was appropriate and lab work system was another excellence program so that AIMS students also could experience how the lab activities in the campus are, different with AIMS in other country which don't have lab work. (UnSri)</p>
